

Purpose of Installation & CPCB Compliance Statement

Instrument: UPC-WA-202– Online Water Analyzer

Make: UPC INSTRUMENTS PRIVATE LIMITED

Purpose of Installation

The installation of the Online Water Analyzer is intended to provide **continuous, real-time monitoring** of key water quality parameters such as **BOD, COD, TSS, and pH** at the outlet of **Effluent Treatment Plants (ETPs)** or **Sewage Treatment Plants (STPs)**. The primary objectives include:

- Ensuring **environmental compliance** by monitoring effluent discharge quality.
- Enabling **real-time process optimization** and control of treatment plants.
- Reducing manual sampling errors and promoting **automated data logging**.
- Providing **early detection** of parameter deviations for timely corrective action.
- Supporting sustainable and responsible water management practices.

This analyzer is designed for rugged industrial environments and offers **automated cleaning, calibration, cloud connectivity**, and integration with **flow meters and RTUs** for complete effluent monitoring solutions.

CPCB Compliance Requirement

As per the guidelines issued by the **Central Pollution Control Board (CPCB), New Delhi**, under the **“Online Continuous Effluent Monitoring System (OCEMS)”** mandate, all industries falling under the 17-category red zone or discharging into surface water bodies are required to:

- **Install Online Effluent Monitoring Devices** at the final outlet of treatment plants.
- Monitor parameters such as **pH, BOD, COD, TSS**, and **flow** on a **24x7 basis**.
- Ensure **data transmission** to the **CPCB/SPCB servers** via RTU over GPRS or Ethernet.
- Maintain records and logs as per audit and regulatory inspection requirements.

The UPC-WA-202 Analyzer is fully compliant with **CPCB Protocols for Online Analyzers**, including:

- RS485/4-20mA communication
- Compatibility with standard RTUs for CPCB data transfer
- Real-time calibration and auto-cleaning features
- Sensor specifications aligned with CPCB measurement accuracy standards
